Continuation of 3.

Applicant's reply has overcome the following rejection(s): the amendment would have overcome the 112 first paragraph rejection for claim

The amendment would overcome the 102(b) rejection over Sugihara for the compound claims 11, 12. The new process claims 16-19 would still be subjected to the 102(b) rejection over Sugihara for reasons of record.

The new claim 11 would still be subjected to the 103 rejection over Juda because the instant ethyl, propyl, and isopropyl are within Juda's lower alkyl of Juda. Furthermore, 'wherein n>0' has no antecedent basis in the claim.

The new claim 12 has no antecedent basis in the base claim 11.

It is unclear whether new claims 13-14 are compound claims, method claims or composition claims.

The device of new claim 15 has no antecedent basis in the base claim 13. Furthermore, the device is in the non-elected group which has been canceled in the previous amendment.

The product of the process of new claims 16-19 is missing but required.
